

DIEDRICHS & ASSOCIATES, INC.

Who We Are

For the past 26 years, we've provided technical services to clients in Iowa and other states. We design products and machines, as well as build prototypes for test and experimentation.

Our clients include large and small companies in a variety of industries. Some projects are unusual and present special challenges. Watch for interesting examples in our future ads.

We are proud of our people. In addition to full time employees, we have a number of retirees, interns, and other part time people that provide special skills and help us keep up when busy.

We look forward to telling you more about our people and our work over the coming weeks. For more information, look for our ads in the Cedar Falls Times or visit our website.
